<AERO> MEETING MINUTES

Meeting #11

Date	11/07/2023
Time	6:00 pm - 8:00 pm (2 hours)
Time Keeper	
Attendees	Sarah, Adib, Chris, Darcy
Apologies	
Please bring/read	
Other resources	
Meeting purpose	Merge and fix functions for it 2, implement persistence
Next Meeting	Thursday 13/07/2023 - Make sure front end works - All functions to be completed by then

Agenda

Item	Agenda Item	Assignee	Notes

1.	Cleaning up		- Move all interfaces into interface file
			- Return same error codes
			- Cut down functions where we can using
			  - find.()
			  - some.()
			  - every.()
			  - filter.()
			  - map.()
			  -

2.	Persistence		- Implement persistence
3.	Remaining Functions		- MoveQuizQuestion: Chris - DuplicateQuizQn: Sarah -
4.	Merging functions		If using isValidCreator, change authUserId to token - Auth Login ✅ - Quiz Question Create ✅ - Quiz Info ✅ - Quiz List ✅ - Admin User Detail
5.

Replying to Yeping Lin

Hi Yeping,
I talked to the other staff members about this, and you were right in saying that the 403 error is the invalid token. Apologies so much for my mistake!

- For 403, you should check if the token is valid/or not, that is, is it in the database.
- For 401, depending on your token structure (JSONified, string, etc.) then you need to check its data type. However, doing so will break black-box testing, so the tutors recommend that you test for `null` or `empty` instead.

Ok I asked in help session and basically the 400 error should check whether the token has been used to log out before. Meaning that we need to store all no longer used tokens in order to check this.
