```
∨ {
    state                   string
                            Enum:

                              > Array [ 7 ]
    numQuestions            integer
                            example: 1

                            The current number of questions in this quiz session

    atQuestion              integer
                            example: 3

                            The current question that has been advanced to in the quiz, where 1 is the first question. If the quiz is in either LOBBY,
                            FINAL_RESULTS, or END state then the value is 0.

}
